⚡ Deploy in 3 Steps (5 Minutes Total)

Get your Lead Enrichment App live on the web in just 3 steps!

Step 1: Extract & Push to GitHub (2 minutes)

Option A: Using the Helper Script (Easiest)

```
unzip lead_enrichment_webapp.zip
cd lead_enrichment_app
./deploy.sh
```

The script will:
- ✅ Initialize Git
- ✅ Push to GitHub
- ✅ Give you next steps

Option B: Manual GitHub Upload

1. Download and extract `lead_enrichment_webapp.zip`
2. Go to https://github.com/new
3. Create new repo: `lead-enrichment-app` (public)
4. Upload all files from `lead_enrichment_app` folder
5. Commit changes

Step 2: Choose Your Platform & Click Deploy (1 click!)

🟢 Railway (Recommended - Fastest)

Click this button →

Deploy on Railway

Then:
1. Sign in with GitHub
2. Click “Deploy from GitHub repo”
3. Select `lead-enrichment-app`
4. Click “Deploy Now”
5. ✅ **DONE! Your app is deploying!**

🔵 Render (Great Alternative)

Click this button →

Deploy to Render

Then:
1. Sign in with GitHub
2. Click “New +” → “Web Service”
3. Connect to `lead-enrichment-app` repo
4. Click “Create Web Service”
5. ✅ **DONE! Your app is deploying!**

🟣 Heroku (If you prefer)

```
cd lead_enrichment_app
heroku login
heroku create your-app-name
git push heroku main
heroku open
```

✅ **DONE! Your app opens in browser!**

Step 3: Get Your Live URL & Share with Team (30 seconds)

After deployment completes (2-3 minutes), you’ll get a URL like:

Railway: `https://lead-enrichment-app-production-xxxx.up.railway.app`
Render: `https://lead-enrichment-app.onrender.com`
Heroku: `https://your-app-name.herokuapp.com`

Share This URL With Your Team:

✉️ **“Hey team! Our new lead enrichment system is live at: [YOUR_URL]”**

Everyone can now:
- ✅ Access from any device
- ✅ Add leads
- ✅ Generate emails
- ✅ Track status
- ✅ No installation needed!

🎉 That’s It!

Your app is now:
- ✅ Live on the web
- ✅ Accessible 24/7
- ✅ Free to use (free tier)

- ✅ Secure with HTTPS
- ✅ Ready for your team!

🆘 Quick Troubleshooting

“Deploy button doesn’t work”
→ Make sure your code is on GitHub first (Step 1)

“App crashes on startup”
→ Check the logs in your platform dashboard
→ Usually auto-fixes on second deploy

“Database not working”
→ Database auto-creates on first visit
→ Just wait 30 seconds and refresh

“Need help?”
→ See full DEPLOY.md guide
→ Check platform documentation

🚀 Ready? Start with Step 1 Above!

Choose Railway for the absolute fastest deployment (2 minutes total).
